

## Round Deli Containers

These round containers are designed to maintain the freshness of your deli products and to enhance their display appearance. These sturdy containers are clear, unbreakable, lightweight, transparent, re-sealable and stackable. They are perfect for food service applications like: deli salads, spreads, dips, soups and fresh cut fruit. One water tight lid fits all sizes to keep foods fresh longer. The containers are embossed with our number1package logo and the percentage of recycled content to help convey the value of the material to both consumers and recyclers.

**30% of about 5 billion lbs. of PETE bottles produced in the U.S. each year are recycled.**
