

## Take Out

Two versatile rectangular take-out containers to replace all ordinary plastic, aluminum, Styrofoam and paper products. Secure snap closure ensures freshness, and eliminates spills when transporting. They can withstand temperatures up to 200° F when used under heat lamps, in warming units, and in microwaves. Made from crack-resistant, cut-resistant polyethylene so your customers to eat right out of the container. But unlike the others they are made from 100% recycled plastic and are recyclable after use. Show your customers your commitment to the environment, health and food safety by making the switch today!

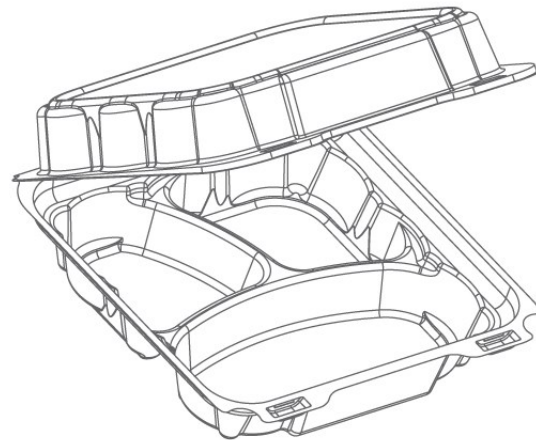

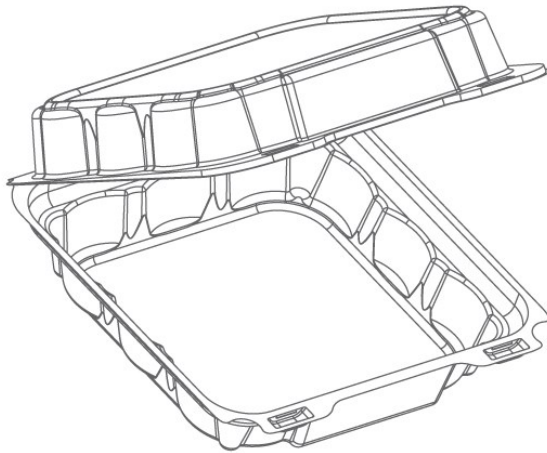

**TO-S-CL**  
**Single Compartment Clamshell (Coming Soon)**
