

Salad Bar

These clamshell style containers are made from recycled Green Bottles and perfect for food service applications where consumers load the containers after making their food choice like: deli salads, spreads, sandwiches, fresh cut fruit and green salads. They have an attached water tight lid to keep foods fresh longer, which is perforated for easy removal while eating that can also be re-sealed. The containers are embossed with number1package logo and the percentage of recycled content to help convey the value of the material to both consumers and recyclers.
